

About WellBee

WellBee: Family Health Diary is a family based health tracker that allows parents to track and manage the health and wellbeing of the entire family and view all the historical data in a simple but elegant week based diary view.

When illness strikes at home, it can be tough to stay on top of everything. When exhaustion creeps in you may start to ask yourself:

- When was the last dosage given?
- How long has this symptom been ongoing?
- Is her temperature higher or lower than yesterday?
- How many times am I supposed to take this medication again and for how long?

Not anymore. With WellBee: Family Health Diary by your side you can:

- Create health profiles for each member of your family
- Track symptoms and their severity over time
- Measure temperatures and see recent changes with historical charts
- Record appointments and doctor diagnoses and schedule future appointments or recurring medications
- Track various growth metrics to view changes over time
- Record injuries and track recovery progression
- Store medications and dosages taken
- Easily keep an eye on any ongoing issues and make quick updates as and when needed
- Set individual or family based reminders so you never forget the important stuff
- View all family data day by day or dig deeper to view individual timelines

Expected Launch Date: 1st September 2026
